

Safety Made Simple™

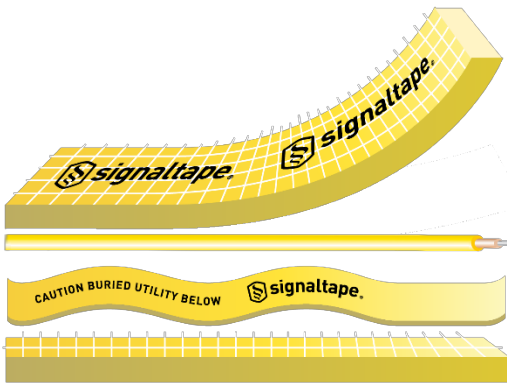

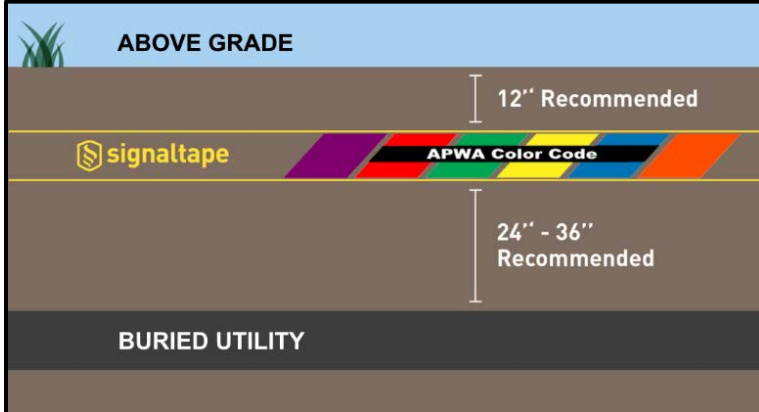

-  **Low Cost**
-  **Optionally Detectable**
-  **Provides Visual Alert Directly to Excavator**

Signaltape® is a proprietary next generation damage prevention and marking system designed to protect buried utilities by visually alerting the equipment operator to the existence of utilities buried below.

Signaltape® Professional Grade includes a 1,250 lbf tensile strength polyester fiber core material, which ensures the tape does not shear on both sides providing a clear and visible warning when struck by an excavation crew.

- Signaltape Film
- Tracer Wire (Optional)
- Polyester Ribbon
- Signaltape Film

Signaltape® is optionally detectable with the inclusion of 14 AWG CCS (unless otherwise specified) tracer wire or RFID. Fully customizable by request.

Signaltape® meets or exceeds applicable industry ASTM standards and follows the American Public Works Association (APWA) color code.
